

DAC LATAM

ABOUT US?

We are an autonomous **digital / distributed** community, focused on technological empowerment as a vehicle for individual and collective sovereignty, through the exercise and practice of decentralized economies based and supported by open source and public blockchain. Deep down, we are a decentralized group of **Latin American** entrepreneurs, who make life in the **web 3.0 ecosystem**.

WHY ?

Our system is **broken**, and we believe in the possibility of restoring spaces for innovation and technological development with social and cultural positive impact based on this new way of organizing ourselves as a community.

Without the need for a trustworthy "**third party**" who, through the bureaucracy, has the possibility to censor us we can go further as humans and as a modern society.

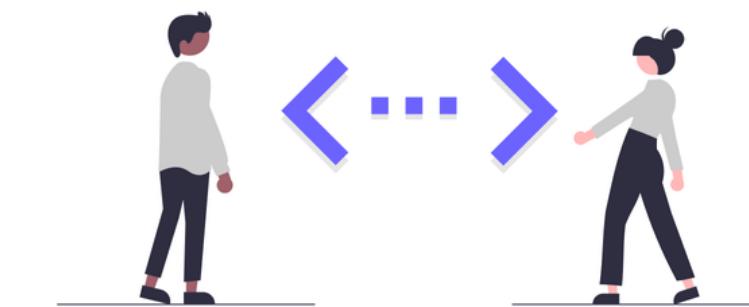

- EOS **blockchain allows us this and much more ...**

HOW DO WE DO?

~ WORKING TOGETHER,
THEREFORE GROWING TOGETHER

~
ELENA.

DAC LATAM

- We carry out decentralized collaborative work, oriented to the progress and improvement the value of **eosio** network and the different open source based blockchains; we provide support to those **projects / dapps** that seek to make a space in the different regions of **Latin America**.
- At the same time, we create self-sustaining, censorship-resistant and transparent business models; using a series of smart contracts written in **C ++** and running on the **EOS** blockchain.
- Also, we support the ecosystem infrastructure for **dapps**, serving local and cloud nodes of different **blockchains** based on **eosio**.

GOALS

PERSONAL GROWTH

The purpose of the community is to increase the technological level of the region, and this can only be achieved by increasing the level of knowledge and education in technology of the people who compose it.

Being part of a DAC, gives us the possibility to participate in projects at the forefront of governance and to experiment in an innovative way new models of organization among peers.

COLLECTIVE GROWTH

The sum of individual efforts in pursuit of common goals creates an intrinsic system of collaborative participation in which we feel more protected by working together.

Through effective peer coordination, we achieve superior results than working alone.

TIME TO DAC IT ON-CHAIN!

DAC CLIENT / GOVERNANCE ENGINE

We are evaluating the best combination of governance engine-contract and **DAC client**, to engage and favor our community in the DAC way on-chain >>
